4.0

Page 4-1

Figure Table Table 4-1

RID ID	PDR	470
Review	SDPS	
Originator Ref	IVV-KRM-05	
Priority	2	

Category Name Interfaces

Actionee HAIS

Sub Category

Subject Level of Detail

Description of Problem or Suggestion:

The table in section 4-1 is not sufficient to build or test the interface.

Originator's Recommendation

Exact formats (down to the bit level), contents, order, method for encoding, and valid values need to be provided for all seven layers of the OSI model (e.g. application, presentation, network, etc.). If any of the layers are not applicable, then it should be stated as such, and if the details are documented in another document, then the document should be referenced. Details concerning handshaking also need to be provided.

HAIS Response Date 5/16/95

The author correctly observes that Table 4-1 does not contain sufficient detail to build or test the interface. As a Preliminary document this ICD is allowed to omit considerable detail unlike the Final ICD that will be published at CDR. The Final ICD will contain sufficient detail to build and test all interfaces.
